

Who We Are

Safety Services Manitoba (SSM) has a proud legacy of serving Manitobans for the last six decades, offering quality occupational and road safety training and consulting solutions.

Our commitment to reducing risks and injuries in workplaces and on the road drives us.

We envision that every Manitoban returns home safely every night.

What We Offer

- Flexible and responsive service, and quick turn-around time for your requests
- Customized courses to address your unique workplace safety concerns
- Convenient programming, including open enrollment courses at our modern facility or on-site training at your location
- A practical hands-on training component in most courses

Safety Services Manitoba offers a great deal of information and knowledge to help build a safe environment for our employees.

SSM has been a key factor in helping our company rise to the best WCB rates in the industry by providing informative and engaging training to our folks. Without SSM we would not have been as successful taking our safety culture to where it is today! They have not only provided their regularly scheduled training above our expectations but have worked with us over the years to develop company specific training. This training even more so, increases our workers knowledge in the field and helps to solidify their belief that our company truly wants them to be safe and healthy, thus strengthening our culture.

- Jason Rice, Regional Safety Coordinator
McCaine Electric / Canem Systems
